

VAST MANAGEMENT CORP

Capability Statement | SBA-Certified Service-Disabled Veteran-Owned Small Business

UEI ZKH3ZV6LJK4
CAGE 20SA4 SAM.gov
Registered - Active

VAST Management Corp is an SDVOSB/VOSB-certified advisory firm helping federal agencies and their prime contractors govern AI, secure systems, and pass audits. Core services span four areas: AI governance, cybersecurity GRC, ATO/RMF readiness, and workforce development. Every engagement is led personally by a doctoral-level CISO (CJCISO, CISSP, PMP) and sized for senior-expert delivery, not staff augmentation. As a certified SDVOSB, VAST is directly awardable through simplified-acquisition, sole-source, task-order, and subcontract vehicles.

Core Competencies

Independent Assessment, Evaluation & Advisory Studies

- Independent security control assessment and program evaluation
- Independent verification & validation (IV&V) and readiness reviews
- Audit and oversight (IG/GAO) readiness and remediation support
- Cyber risk posture assessments with reproducible, auditable scoring; policy and feasibility studies

Security Authorization, RMF & Continuous Monitoring

- NIST RMF implementation and ATO support
- System Security Plans, SARs, boundary and body-of-evidence documentation
- NIST SP 800-53 and CSF control assessment; POA&M development and closure
- ISSO support, continuous monitoring and FISMA program execution
- C-SCRM and third-party risk (NIST SP 800-161)

Cybersecurity Governance & Executive Advisory

- Fractional/virtual CISO advisory and security program build-out
- Cybersecurity strategy, roadmap, policy and standards development
- Zero Trust strategy (OMB M-22-09)
- Executive and board-level cyber risk reporting

Incident Response & Resilience

- Incident Response Plan Development & Testing
- Tabletop Exercises & Crisis Simulations
- Business Continuity & Disaster Recovery Planning
- Breach Notification & CISA / CIRCIA Coordination

Training & Workforce Development

- Security awareness program development and delivery
- Federal AI governance series
- Role-based cybersecurity curriculum design and courseware development

Program, Acquisition & Project Support

- PMP-aligned program and project management
- PMO stand-up and support
- Acquisition and procurement support; requirements and market research
- Earned value management and schedule risk analysis

AI Governance & Assurance

- NIST AI RMF and ISO/IEC 42001 implementation; OMB M-25-21 / M-25-22 readiness
- AI use-case inventory, acceptable-use policy and ethics frameworks
- AI vendor and model risk assessment

Key Personnel

Dr. Noel G. Alexander, President & CEO DBA • EMBA • C|CISO • CISSP • PMP

U.S. Air Force and New York Air National Guard veteran. 20+ years leading security governance, risk, and compliance programs. Graduate-level instructor in information security management. Doctoral research in technology and software management.

Differentiators

- AI Governance Risk Framework (AIGRF) instrument: a deterministic 84-control, 14-domain assessment producing an auditable risk index (ARI, 0 to 100) mapped to binding federal authority.
- Principal-delivered, not bench-staffed.

For The Department of Veterans Affairs

- Vets First eligible: SBA-certified SDVOSB, eligible for VAAR subpart 819.70 Veterans First Contracting Program set-asides and sole-source awards.
- Sole-source ready: Prepared to support a VAAR 819.7009 / FAR 19.1406 sole-source justification at values well inside the authority ceiling.
- Right size for VA: Our delivery model matches the sub-\$1M advisory, assessment, ISSO-support, and training task orders VA places most often.
- VA-relevant scope: RMF and ATO support, control assessment, POA&M closure, privacy and records support, IR planning, and role-based workforce training.
- Veteran-led: Air Force and Air National Guard service. We understand the mission and the population it serves.

For Prime Contractors – SDVOSB Subcontracting

- We are structured to close SDVOSB subcontracting-plan gaps quickly and cleanly.
- Typical scope size: from about \$50K to low-millions task orders and subcontracts, the band where most SDVOSB subcontracts are placed.
- Contract types: FFP, T&M and labor-hour CLINs. Comfortable as a defined-scope, defined-price subcontractor.
- Fast to paper: Small firm, single decision-maker. NDAs, teaming agreements, and subcontracts move in days, not weeks.
- Low conflict risk: Advisory and assessment only. We do not resell hardware or software, and we do not compete for your integration, O&M, or SOC scope.
- Documentation ready: Active SAM registration, current reps and certs, and an accounting system suited to cost-reimbursable flow-downs.

Clients and Organizations Served

Enterprise and commercial engagements. Security governance, GRC program build-out, PCI remediation, global security program leadership, M&A technology due diligence, and multi-hundred-million-dollar IT portfolio delivery across North America, EMEA, APAC, and Latin America. These were regulated, externally audited environments requiring the same evidence discipline as federal assessment and authorization work, at scales from single-system remediation to enterprise-wide programs. Engagement detail, delivery role, and client reference available on request.
